- MongoDB
- React

## EDUCATION

**University of Connecticut | School of Engineering: Coding Bootcamp**
January '22 – June '22

- Dedicated over 1,00 hours of intensive hands-on training to develop dozens of web applications in JavaScript.
- Utilized multiple frameworks such as jQuery, Express, Node.js and React.
- Created user-friendly sites utilizing CRUD operations and RESTFUL routes together with API integration.
- Successfully completed multiple projects ahead of expected due date with colleagues.

**Wilbur Cross High School| New Haven, CT**
September '14 – June '18

- 3.92 GPA
- AP Spanish

## WORK EXPERIENCE

**Amazon Warehouse| Associate- North Haven, CT**
March '20 – PRESENT

- Required to receive products using radio frequency scanners and relocate products using powered equipment.
- Picked customer orders on all levels of a multi-level mezzanine, sort, pack, shipped customer orders, and troubleshoot problems to resolution.
- Safely and efficiently box/package customer products converted from raw material to shippable goods utilizing box taper machines and manual packaging methods.
- Expected to understand aspects of production; adhere to strict safety, quality, and production standards.

**McDonalds Inc.| Shift Manager- West Haven, CT**
April '18 – March '20

- Demonstrated excellent communication skills between management and crew, ensuring timely completion of all business activities.
- Handled cash drawers and counting of deposits before and end of shift.
